FY 2008 Work Plan – Comment Form

EPA appreciates your input into our planning effort for 2008. You do not have to use this form to submit comments on the Work Plan. Use the form only if it's convenient - it's not necessary to fill it out completely. The following questions are only suggestions:

- Do you think soliciting public comment on our Work Plan is constructive or would you rather have EPA create the plan in Denver and then present the finished product in Libby?

- Which is more important for you to have cleaned up in 2008: the golf course or the creekbeds? Why? _____

- Do you think the streets and citizens could tolerate more EPA project truck traffic during the construction season? _____
- Do you think the Investigation Projects are a waste of time and money? (If so, what should be done instead?) _____

- Other comments? _____

Optional: Name _____ Phone _____ E-Mail _____

Please turn your hardcopy comments in at the EPA Information Center (501 Mineral Ave.) or e-mail them to linnert.ted@epa.gov

Thanks for your participation!
